PROJECTS

Employee On-boarding System

- Employee onboarding system is a job portal application where anyone can apply for jobs in this organization.
- This application will help them to figure out how many rounds they are qualified and how many remains left, all the data of applications is handled by the admin.
- Here the admin also have a portal to manage all the applicants data.

Homestay Management System

- Homestay Management System is a system based on accessing the internet to book for rooms in a hotel. The purpose of this study is to develop and implement an online hotel reservation system for hotels, that will replace the manual method of booking for hotel rooms.
- Main aim of designing this project is to design a system that can manage and handle the activities that are involved in a hotel reservation in an organized, cost-effective and reliable way. It will help the administrative to do their work in very simple manner without causing any trouble and Visitors or customer to reserve their room according to needs before they come to hotel.

SKILLS

HTML, CSS, JavaScript
ReactJS, Nest JS, NextJS
